Dirt in the city has no future.

The cleaning of sidewalks and pedestrian areas is one of the most important activities for urban centres because it restores decorum and order, and above all guarantees safety and well-being to citizens. As these spaces evolve, the tools used to obtain effective results must also evolve. The time has come to abandon broom and dustpan.

The ITALA 135 electric sweeper has been designed for cleaning city centres, sidewalks, pedestrian areas and parks. It is so compact and easy to handle that it can also be driven with one hand and does not require a license. With ITALA 135, you can move easily between benches and trees and, thanks to the chariot, you can comfortably drive it for long stretches from one area of the city to another.

**HOW IT WORKS**

- **Fire extinguisher, horn, reverse buzzer, flashing beacon light, parking brake and automatic stop with hood open.**

- **Safety devices**
  - Made of carbon, to suck material from flower beds, under benches, and between the bicycle racks.

- **Suction hose**

- **Control handle**
  - Ergonomic and anti-vibration for brush movement.

- **Collection bin**
  - Ergonomic wheelbarrow shape for fast emptying. Heavy Duty disposable bag can be used.

- **LED front lights**
  - For high visibility during night shifts.

- **Tool kit**
  - Broom and litter picker to collect waste.

- **Front bin**
  - For bulky waste collected along the way.

- **Anti-dust system**
  - Water spray at the brushes to eliminate dust.

- **Central brush**
  - To collect material and dirt.

- **Side brushes**
  - Equipped with an anti-impact system.

**Ergonomic wheelbarrow shape for fast emptying. Heavy Duty disposable bag can be used.**

**For easy recharge wherever the machine is.**

**Maintenance free battery**

**MAX SWEEPING WIDTH**
- 125 cm

**HOPPER CAPACITY**
- 135 l

**COVERAGE PERFORMANCE**
- 6500 m²/h

**WORKING TIME**
- > 8 h

**HOPPER CAPACITY**
- 135 l

**WORKING TIME**
- > 8 h
The powerful electric motor of ITALA 135 allows you to travel up slopes with 20% grade. Useful for when you have to work on uphill or downhill roads, or the ramps of multi-storey car parks.

Conquer any slope.

Energy at your fingertips.

Depending on the battery used, ITALA 135 guarantees you an uninterrupted work autonomy of more than 13 hours. The on-board battery charger can work with a common electrical socket.

More clean air for you too.

Thanks to the mechanical action of the central brush, waste is collected inside the 135 L bin, while the powerful filtering system absorbs and retains PM10 fine dust, sending clean air into the environment. The suction hose allows you to remove dirt from tight corners and spaces that cannot be reached by brushes, such as between bicycle racks or in flower beds.
Agility.

Sidewalks and pavement without access ramp would normally be an obstacle for your work. ITALA 135 can be equipped with on-board ramps that allow you to get on and off from all sidewalks, in total safety.

Enhance your experience.

You can equip ITALA 135 with all common cleaning accessories and tools that make your working day easier and more comfortable. A lockable glove compartment located under the hood allows you to keep your keys, telephone and other personal items safe.

In harmony with the environment.

Thanks to its completely electric operation, which does not generate any noise or emit any exhaust gas, ITALA 135 is included among the Green Purchases or GPP (Green Public Procurement), because it its low environmental impact. The silent operation allows you free access to historic centres, pedestrian or restricted access areas, at any time of the day without disturbing the public.
**ITALA 135**

While sitting down you can work even faster.

Cleaning often requires you to work in several areas of the city, which forces you to move all the equipment. For this purpose, you can add the chariot option to the ITALA 135 to allow seated travel from jobsite to jobsite at 6.5 km/hr. This also makes it more comfortable to work for long stretches.

The seat is adjustable to ensure maximum operator comfort and visibility during sweeping.

**Benefits**

- Time savings when traveling.
- Greater operator comfort.
- Improved performance and costs.

**How does it work?**

With a click the chariot is hooked to the machine using a ball hitch located above the collection bin. The safety lock system will ensure maximum stability during use. When you finish the activity you can put the chariot away and use ITALA 135 as a walk-behind sweeper.
